

OPEN EAGO

SECURING B2B Agentic Flow with ERC 8004 / MCP extensions

ARCHITECTURE NOTES

Communication patterns

1. On-Chain Events

2. On-Chain Fulfillment Transactions

3. On-Chain Request Transactions

4. MCP Protocol Requests/Responses

5. Bounds Monitor Reports

6. Off-Chain Document Retrieval

7. REST API Calls

8. Governance Authorization Calls

9. Reputation Feedback Submissions

10. Multi-Sig Approval Requests

11. Consortium Governance Proposals/Votes

12. Audit Exporter Subscriptions

Architecture foundation

1. ERC 8004 Identity model (extended)

2. MCP Oracle Pipeline

3. Registry-as-authorization

4. Distributed tracing

5. 3-Tier network topology

ERC 8004 Identity Triple NFT

1. Agent Wallet (fulfilled tx)

2. Oracle Contract Address

3. Agent Id (NFT Token ID)

+

agent card hash and participantId

B2B Controls

1. Payload privacy

2. Permissioned agent minting

3. Multi-signature governance

4. HSM Key management

5. Bilateral flow authorization

6. Institution-Credentialed Approvers

7. Reputation Anti-Gaming

8. Regulatory Audit Exporter

9. Consortium Governance
